

The rules for using  
personal data have  
changed...

# Data Protection Compliance and what it means to your business...

GDPR is law and you must be compliant in 2018. It will change the way your business can collect, use and transfer personal data. Not only will you need to know where and how personal data is stored, you may also need to change the way it is collected.

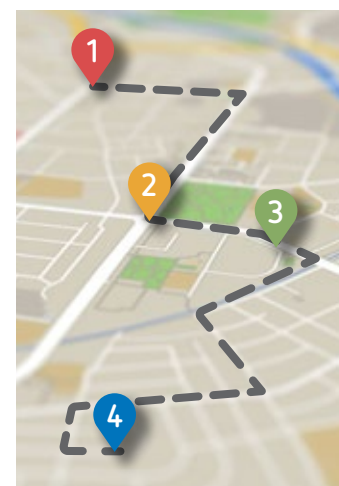

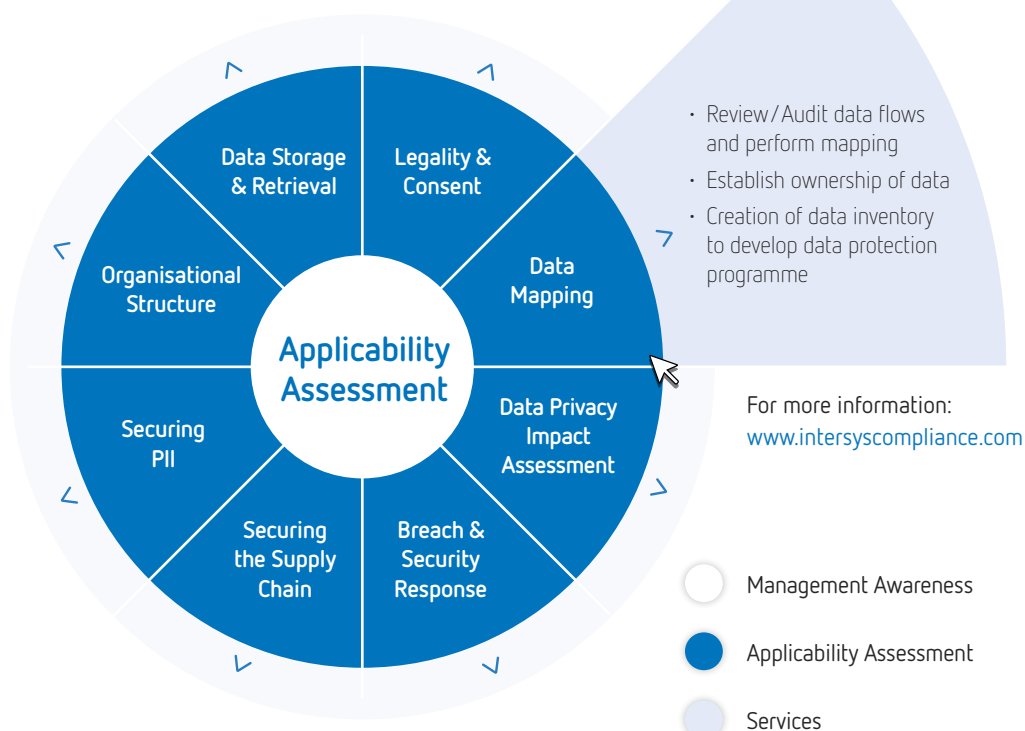

Our services are tailored to your needs: only by getting under the skin of your organisation can we help understand your data collection procedure risks and avoid future penalties, should your data be compromised.

## Route to Compliance

The General Data Protection Regulation brings with it increased rights for individuals and increased focus on consent that organisations should comply with. Penalties for infringement will be severe: up to €20m, depending on which article of the regulation was violated.

Intersys Compliance will help your organisation navigate GDPR, to ensure compliance.

## Applicability Assessment

- 1) **Understand GDPR**  
[implications for your business]
- 2) **Analyse and identify gaps**
- 3) **Define prioritised actions, owners and timelines**
- 4) **Implement, report and monitor**
